Product Information:

Self-adhesive frosted/milky window film is a very durable semi-transparent product made of PVC film with decorative print. This print is resistant to UV radiation, which makes it distinguished by high durability. The film can be easily trimmed with a wallpaper knife during installation, fitting it precisely to the edges of the glass. Note: after trimming the film the product is not returnable.

Installation Instructions:

1. Verify that the product size and graphics match. In case of discrepancies contact us. (After installation the product will not be returnable) **2.** Thoroughly wash the glass with water and a mild detergent. **3.** Dry and degrease the glass surface (e.g. with isopropyl alcohol). **4.** Cut the film to the appropriate size. **5.** Remove the protective layer from the film's adhesive. **6.** Spray the glass with a solution of clean water with a few drops of dishwashing liquid. **7.** Moisten the adhesive side of the film with the same solution – this will facilitate positioning. **8.** Apply the film to the glass, adjust its position. **9.** Use a squeegee or a clean cloth to push water out from under the film, starting from the center towards the edges. **10.** Make sure that excess water and all air bubbles have been removed from under the film. **11.** Leave to dry completely (approx. 24 hours).

Cleaning:

For cleaning the film use a soft cloth with water or a mild cleaning agent. Avoid: aggressive detergents (e.g. with alcohol, acetone), rough sponges and brushes, pressure washers. Regular cleaning ensures an aesthetic appearance and durability of the print.

Important! Observe precautions when using the product:

Use tools for trimming and installing the film with care. A squeegee, wallpaper knife or scissors should be used carefully and kept away from children. When installing the film on the glass, be especially careful when in contact with the edges of the glass – they may be sharp and cause cuts. Do not use the film on damaged or rough surfaces. Avoid installation at very low temperatures (below 10°C). Do not touch the adhesive with fingers – this may weaken adhesion. Do not use the film in places exposed to direct contact with fire or high temperature. Before installation store the film in a dry place, away from sunlight.
